## EDUCATION

### G. Pulla Reddy Engineering College

B.Tech in Computer Science and Business Systems, CGPA: 9.32

Kurnool, AP

Nov 2022-June 2026

### Sri Chaitanya Junior College

Kurnool, AP

BIE Board(class XII) ,Percentage: 92.8

June 2020-May 2022

### Sri Chaitanya Techno School

Kurnool, AP

SSC Board(class X) ,Percentage: 100

June 2019-April 2020

## EXPERIENCE

### CodSoft Internship

Nov 2024 – Dec 2024

Web Development Intern

Online

- Here , as an intern at Codsoft , we delve into the world of HTML , CSS and JavaScript . Here , I created three projects which were portfolio creation , calculator and a website .It was an amazing experience working there and learning a lot of new things.

## ACHIEVEMENTS

### Reliance Foundation Undergraduate Scholarship | Scholar

Nov 2022 – June 2026

- Out of over 50,000 applicants, I am honored to be one of the 5,000 students chosen for this prestigious scholarship. This opportunity have empowered me to pursue my academic and career aspirations.

### AWS AI and ML Scholar | Amazon Web Services

June 2024 – Oct 2024

- AWS Deepracer has earned me the position of one of the 2000 scholarship recipients in this cohort globally. Throughout the program, I delved into AI, Machine Learning, Neural Networks, Transfer Learning, Image Processing, and Deep Learning algorithms.

## COMMUNITY & LEADERSHIP

### IEI Coordinator

November 2023 – June 2024

Student Organizer

Kurnool, AP

- Responsible for organising events to enrich the culture of teamwork and technical awareness among the students in class. Collaborated with the team to ensure smooth event execution.

## PROJECTS

### Random Password Generator | HTML, CSS, JavaScript

Sept'24

- Enables users to create passwords with specified lengths and character sets (uppercase, lowercase, numbers, special characters) to meet diverse security requirements.
- Provided immediate feedback on password strength, enhancing user understanding of secure password creation practices.

### Domain Expert System | SageMaker, AWS, Python, Machine Learning

Apr'24

- Developed a Large Language ML model tailored for finance domain assistance and successfully deployed the model on AWS SageMaker.
- The model I created generates finance domain-specific content in response to prompts related to financial matters.

## TECHNICAL SKILLS

**Languages:** C, C++, Java, Python, HTML, CSS, JavaScript

**Frameworks:** Bootstrap, GitHub, FlexBox, Grid

**Relevant Coursework:** Data Structures and Algorithms ,Object Oriented Programming, DBMS

## CERTIFICATIONS

**Infosys Spring Board:** Programming in Java, Applied Generative AI

**Udacity:** Introducing Generative AI with AWS

**Swayam NPTEL:** Programming in Java

**Spoken Tutorials:** HTML
